

**FOR IMMEDIATE RELEASE****ISY® DENTAL IMPLANT SYSTEM FEATURED AT ADA 2015 ANNUAL MEETING****Henry Schein Dental Surgical Solutions Makes Digital Dentistry ‘iSy®’ (ē‘zē’) for Surgeons and their Interdisciplinary Partners**

**MELVILLE , N.Y., November 5, 2015** – Henry Schein Dental Surgical Solutions is featuring the new iSy® (pronounced, ē‘zē’) implant system at its booth (#2213) during this week’s American Dental Association (ADA) Annual Meeting, taking place Nov. 5-10 in Washington, D.C. iSy, manufactured by leading implant provider, Camlog, and exclusively distributed by Henry Schein, was first introduced into the U.S. market during last month’s Annual Congress of the American Academy of Implant Dentistry (AAID).

iSy, a play on the words Intelligent System, is designed to optimize implant treatment efficiency, while minimizing the complexity of treatment planning - enabling practitioners to choose a digital, conventional or combined treatment workflow.

The iSy implant system is packaged with everything needed for the clinical team to place and restore an implant. The system includes the implant, a pre-mounted abutment, two multi-function caps (scan body, impression coping, temporary coping, bite registration aide), a protective cap and a final drill. iSy offers clinicians the choice and flexibility to customize implant cases.

“As more surgeons and their restorative partners are driven to deliver high-quality patient care at an affordable price, implementing digital dentistry into the practice offers an opportunity to improve efficiency and enhance patient care. Henry Schein offers a comprehensive technology portfolio with associated training for dental implant digital dentistry. The CBCT, intra-oral scanner, final lab scanner, and mill, can all be seamlessly connected with the innovative implant concept of iSy. Our customers will have everything they need for an entire implant case from final drill to final abutment in one package all supported by Henry Schein and its digital portfolio.” said Tony Susino, Vice President and General Manager of Henry Schein Dental Surgical Solutions.

iSy is optimized for a digital workflow. By partnering with leading technology manufacturers, the system can seamlessly integrate with the diagnosis and treatment plan phase (CBCT); the intraoral digital impression; the CAD/CAM abutment delivery, and the final crown, either during the first stage surgery or at a later phase after healing. Conventional and digital treatment workflows can also be combined to provide a customized final result.
